

## INSTALL MONGODB ON CENTOS (RED HAT DISTRIBUTION)

Configure the package management system (yum).

**Create a `/etc/yum.repos.d/mongodb-org-3.6.repo` file so that you can install MongoDB directly, using yum:**

```
[mongodb-org-3.6]
```

```
name=MongoDB Repository
```

```
baseurl=https://repo.mongodb.org/yum/redhat/$releasever/mongodb-org/3.6/x86_64/
```

```
gpgcheck=1
```

```
enabled=1
```

```
gpgkey=https://www.mongodb.org/static/pgp/server-3.6.asc
```

Save and exit

Install the MongoDB packages.

To install the latest stable version of MongoDB, issue the following command:

```
sudo yum install mongodb-org
```

Then run mongod:

```
sudo service mongod start
```
